May 2025

May Meeting Information

The next in person Meeting will be on May 22nd 2025 at the club Shack at Betcha Bingo hall on 2420 W Irving Blvd, Irving, TX 75061.

President's Corner

Ron Ford KF50MH

President, Irving Amateur Radio Club, Inc.

As I sat down to write this the weather guessers were forecasting our first 100-degree day of the year. Hope everyone has their air conditioners serviced and tuned up for the season. (Because it takes me several days to get this article put together it appears that 100 did not happen---thankfully.)

If you missed last month's membership meeting you missed a unique presentation by George Bradford, KF5QEZ who is the co-founder of the NTX NVIS Net. They are introducing a different methodology for moving messages during a disaster utilizing NVIS technology. If you think you might be interested in learning more about it sign up for their Groups.io page at NORTH-TEXAS-NVIS-NET. There is a lot of activity there so scroll, scroll and scroll some more.

Last week George contacted me asking if we might be interested in sharing message sending resources with a club in south Kansas. If anyone is interested in pursuing this effort please contact me at president@irvingarc.org. At this time the board is not in favor of making this a club activity but if members would like to participate as individuals we'll put you in touch with the inquiring individual.

Speaking of presentations. This month's presentation will come to us via Zoom from RT Systems. Here is a little bit about Karin Thompson, the presenter.

She is KD4DXX and has been a licensed ham since 1990. She has worked in the ham radio industry since then and seen LOTS of changes in communications and technology. There has been a lot to learn over the years but so very much has remained the same. On most days you won't hear her on the air but will find her investigating settings and options of various radios to solve a reported problem of unusual behavior or to think of unusual ways to get more functionality with fewer button presses. She enjoys helping others get on the air and get the most use from the features of their radios.

President's Corner Cont'd

Thanks to Kirk N3KDP for arranging this presentation.

Technology abounds. We believe we now have the resources in place for live streaming our meetings and presentations. If you are unable to attend in person all it takes is signing into Zoom at this link -- <https://us06web.zoom.us/j/2683915944> when prompted for a passcode enter 1955 then sit back and enjoy the meeting. This has truly been a team effort. Thanks to Roger N5RCB and Kim N5KCB for arranging for the Zoom account and getting us up and running in that arena. Thanks to Ken N2VIP for identifying a great camera/microphone/speaker device that will enable great interactive sessions. Thanks also to Will N5TLH, Barry N5SMW, Kirk N3KDP, Don NA5V, Roger N5RCB and Karin from RT Systems for helping with the dry run "shakedown cruise" where we were able to learn what it took make it all come together. Finally, a special thanks to Kirk N3KDP for volunteering to be our in-house A/V technician.

Also, at our April meeting the club presented certificates of appreciation along with a \$100.00 check to Ken N2VIP and Bill N5BB for their years of service in leadership positions in the club.

In addition, Jerry K3RWT was recognized for his many contributions to the club such as the VHF contest and Newsletter editor.

John KF5PFP and Jerry KB3RWT

President's Corner Cont'd

The officers now have email boxes that point to Irvingarc so that communications can be standardized and not go to personal email addresses. This will also save a lot of re-programming time when new officers take office. The addresses are as follows:

President@Irvingarc.org

Vice-President@Irvingarc.org

Secretary@Irvingarc.org

Treasurer@Irvingarc.org

Last week we were contacted by Bodies Race Company, who is looking for radio clubs to partner with them for the purposes of providing communications services for several races in the metroplex, one of which is here in Irving. The Irving event is Saturday Oct. 18 and is a Halloween theme. It is felt that it will take 10-12 individuals to man the various positions. The Board of Directors discussed the proposal at our meeting Sunday evening and decided that we would support the Irving event IF club members will agree to participate and support the event. The proposal will be brought to the membership at the meeting Thursday May 22.

What have you done in amateur radio lately? How about sharing it with the rest of your fellow members? Have you activated a POTA park, made a new DX contact. Worked a DXpedition? Our newsletter editor is looking for bits and pieces from our members. Your submittal does not have to be near as long as this one is. It doesn't take much to fill a quarter page or so. Send your submittals to Jerry at jerry.aberdeen@gmail.com no later than the Sunday evening prior to our monthly meeting on Thursday.

IARC used to be recognized as an ARRL Special Service Club. A Special Service club exists to go above and beyond for their communities and for Amateur Radio. They are the leaders in their Amateur Radio communities who provide active training classes, publicity programs and actively pursue technical projects and operating activities. Ron KC5HPO is exploring what it would take for us to reestablish this recognition. He is also researching what an individual operator must do to be recognized on the Public Service Honor Roll. I do know that it involves participating in various activities over and above just rag chewing on the radio.

The DFW Ham Expo is Friday afternoon and Saturday morning and afternoon June 6 and 7. The club will have a PIO (Public Information Table) and a sales table. We are in need of folks to help at those tables. You don't need to spend the full time but a two hour commitment will be appreciated. Contact President@Irvingarc.org if you can help.

From The Desk Of the Secretary

John Moss KIWRQ was presented a \$50 Visa gift card from the Open House on 18 April 2025 John Cheyney KF5PFP read a letter from Kristy Nguyen, one of the Irving ISD students who received a scholarship from the club Ron Ford KF5OMH presented Ken Hansen N2VIP and Bill Byrom N5BB with awards for their service to the club as officers. The club has purchased a Zoom corporate account. We have also bought a pair of Bluetooth speakers for meetings. We are currently looking to get a camera to livestream meetings. Ken Hansen N2VIP found a 360 degree camera to complete the package. Ron Ford KF5OMH is asking for \$400 for that camera.

- Motion to accept: Ron Tabb KC5HPO
- Second: Ken Hansen N2VIP
- Accepted unanimously

Field Day Plans: Tom Schuessler N5HYP updated the club. Kim Bacak N5KCB has reserved the #2 and #3 Pavilions at TW Richardson Grove from 10am to 8pm. Tom plans to have a meeting in May to organize the event.

John Cheyney KF5PFP asked for \$2500 to replace the two desktop computers in the shack. The plan includes moving the Echolink node from Bill Byrom N5BB's house to the shack.

- Motion to accept: Bill Byrom N5BB
- Second: Billy Geer KA5OZC
- Accepted unanimously

John Cheyney KF5PFP also asked the club for permission to dispose of old computers the club has. This includes:

- Three Dell laptops running Windows 7
- One Desktop labeled with Windows 7
- Four windows desktops running Windows 10
- Motion to accept: Will Turk N5TLH
- Second: Lyle Baker AI5NO
- Accepted unanimously

John Cheyney KF5PFP gave an update on the shack. There are a number of items left that need to be disposed of. This includes broken radios, old coaxial cable, and paint. Several club members volunteered to look into what they can do to help.

Ron Ford KF5OMH has an article in this month's newsletter about the new Officer and Director structure. Each director has taken responsibility for a specific area of the club

- Barry Mac Gregor N5SMW: Administration
- Roger Bacak N5RCB: Operations
- Shane Outlaw KI5GBU: Education and Outreach
- Will Turk N5TLH: Technical

The goal is to get at least two people able to work in all the areas.

John Cheyney KF5PFP presented Jerry Aberdeen KB3RWT with an engraved call sign light for stepping up recently to assist the club:

- Editing the newsletter
- Managing the repeater contest recently held
- Flying his drone over the roof to assess the antennas after a recent storm

Raffle for \$25 Visa Gift Cards

Director: Will Turk N5TLH

Meeting called to order at 1830 by Ron Ford KF5OMH

9 members present

Old Business:

Ron Tabb KC5HPO reported about Honor Roll and ARRL Service Club status. He contacted the ARRL and is getting more information.

Kim Bacak KC5HPO is going to change the Treasurer's reporting. She will continue to do it month to month but will make an addendum up to the day of the meeting so we have current numbers.

Field Day: Roger Bacak N5RCB has been talking to Tom Schuessler N5HYP. Tom is asking for help. Roger is going to work with Tom.

Ron Tabb KC5HPO is taking responsibility for the Christmas Party and is looking at locations and options.

Barry MacGregor N5SMW still needs to get with Bill Byrom N5BB to talk about the outstanding grants and the scholarships. Barry will work to get committee members for those events. Barry will also start getting new ideas for a By-Laws revision project.

Barry will be participating at a ScoutsBSA event in the Mid Cities at the end of May. It will be at Bedford at the Knights of Columbus. He has the latest version of the Radio Merit Badge book and is looking at options for the club to get more involved with Scouting.

Will Turk N5TLH: The club has two new repeater controllers with updated technology that need to be installed on repeaters. New computers are installed and remote radio is up. Next step is to work on moving the EchoLink node when Ken Hansen N2VIP gets back. The next club meeting will be livestreamed with a remote speaker.

John Cheyney KF5PFP: First Aid Kits are in place in the drawer and labeled. The officers do not feel the need for an AED right now.

From The Desk Of the Secretary

Shane Outlaw KI5GBU: Multiple options for city events to attend and set up and pass out materials. He has sent out a lot of emails to people introducing himself and asking people to visit or attend. He is also looking into the possibility of a text based information service to get information out to members.

Ron Ford KF5OMH said officers now have designated mailboxes. The Directors do not feel like they need mailboxes.

Ron Tabb was talking to CBRE who manages the hospital where the repeater site is. He has documentation a year ago asking for our insurance. Officers decided to wait until they ask again..

New Business:

New Member application: When an application comes in the Secretary sends them an email telling them when the next meeting is and any events in between then and the next meeting. The question was asking whether we actually need to vote on members. This will be discussed during the By-Law review.

Three Year Plan: This is not something we want to look at right now but something we need to do soon.

Ron Ford KF5OMH wants every Officer and Director to come up with a Job Description for their position. He would like to be done in the next couple of months.

HamClub Online. There is a membership category called 12 Month Extension. This came after the COVID outbreak when the club decided to give everyone a free year. Ron Ford KF5OMH will reset everyone out of that category.

DFW Ham Expo PIO table: Possibility of getting a table skirt or smaller banner to use at public events. Shane Outlaw KI5GBU will look at getting one of those for the club. Ham Expo has donated a table and we have bought a table that we can use. At the next meeting the club members can go through the shack and decide what needs to be taken up there. We also need to find someone to haul it. We also need people to operate the PIO table and the sales table. Ken is working to get those tables side by side.

Roger Bacak N5RCB. The N2DFW Repeater Association is an association started in the mid 1970's by a group including IARC members. In 1978 it was relocated to the Wells Fargo bank building. They currently have four to five active members at this point. The building has been sold and the new owners want some kind of compensation. It has been listed as the backup repeater for the Irving RACES group. Roger is asking if there is any way the club can help by extending their 501(c)(3) status to cover this, which would allow the building owner to donate the cost of the location where the repeater is. The repeater is currently shown as a closed repeater, although Roger has asked that be changed. Roger is asking to extend the club's 501(c)(3) status because it's used as the backup repeater for RACES. John Cheyney KF5PFP stated he wanted to have a legal consult on what it would take to do that. Roger said that the DFW Repeater Assoc would cover the cost of a consult with a tax lawyer on whether that was legal or not. Ron Ford KF5OMH said one option would be to absorb the DFW Repeater Association and all its equipment, and the club would take responsibility. The DFW Repeater Association could also apply for its own 501(c)(3) status as a separate entity. Ron offered to assist Roger with that. Ron said he could also offer a cost to the club to buy the equipment.

Roger Bacak-N5RCB

From The Desk Of the Secretary

The club received a communication from a group that puts on running events. This would be an opportunity for the club to be involved in something. This company is a for-profit organization. Shane Outlaw KI5GBU asked if it would be possible for the organization to put our information on their information. Ron Ford did some research on the company and found very little. This will be brought up at the club meeting on Thursday to see if there is enough interest from the club to commit to the event.

Ken Hansen N2VIP found a drive-on mast support at Dayton. The club currently has his. Ron Ford KF5OMH authorized Ken to buy one to replace the one he has.

After the presentation last month, Ron told the presenter he would put out to the club whether they wanted to partner with a club in Kansas to test out this new method of emergency communication. Ron has a paragraph in the newsletter article about this for individuals interested, acting as individuals but not as the club.

Will Turk N5TLH requested that the Directors have access to HamClub Online to send out messages for committee meetings, and for other things they are involved in. Ron Ford KF5OMH will check their current status.

Roger Bacak N5RCB made a motion that the club look further into what the club could do to assist the N2DFW repeater association and prevent them from losing their repeater.

Second by Ron Tabb KC5HPO

John Cheyney KF5PFP voted no.

Ron Ford KF5OMH did not vote.

All others present at the meeting voted yes.

Roger Bacak N5RCB will take that on.

John Cheyney KF5PFP will send the minutes of this meeting to Jerry Aberdeen KB3RWT for the next newsletter. He will send the notes out to the group for review.

Kim Bacak N5KCB asked if we want to continue to use Visa gift cards, since they cost us an additional fee. We have two cards for the next meeting. This was tabled to the next meeting.

Roger Bacak N5RCB said in the past the club used to do an event called 'Spook Patrol' during Halloween. They would patrol areas and report back any situations they found to a net control. This was tabled to next month.

Motion to Adjourn: Kim Bacak N5KCB

Second: Barry MacGregor N5SMW

Open Shack Day, April 18

By Ron KF50MH

In recognition of World Amateur Radio month IARC held an Open Shack Day April 18 from 12:00 – 18:00. Seven members and three guests attended the event. One of the guests was Thomas Lindenthal, DO3TL from a suburb of Berlin Germany. Tom was visiting the DFW area on holiday or vacation as we might say it. As part of his pre-trip planning, he had contacted the Dallas Amateur Radio Club asking if there would be any radio events that he might attend while here. They didn't have so I contacted Tom and offered that he might like to attend our event. He took me up on the offer, so I picked him up in the Bishop Arts area of Dallas and brought him to Irving for the day.

Tom thoroughly enjoyed visiting club members and making contacts using our club station. He was particularly thrilled to make a contact in Australia from Irving. Evidently, that is a stretch from Berlin. After his arrival back home he wrote me a short email thanking IARC for their hospitality during his visit.

As part of the event, we held a blind drawing for a \$50.00 gift card. All attendees were eligible for the drawing. John Moss KI5WRQ was the lucky winner. He and his wife Mary attended the gathering. This was Mary's first visit to the shack.

Some attendees shooting the breeze.

Tom DO3TL and Ron KF50MH enjoying the day

Monthly VE Report

by Roger Bacak N5RCB-W5YI CVE 35000

- April 24, 2025 – Club Meeting- No applicants were present for testing during this session.
- May 10, 2025 – Business Jet Center- Four applicants participated in the session:
 - Three successfully earned their Technician licenses.
 - One upgraded to General

ARC Website Suggestions – Your Input Needed!

Hi everyone,

I'm currently gathering ideas on how we can improve both the functionality and appearance of our club's website. If you have any feedback — whether it's something you love, something that could be better, or a brand-new idea — please don't hesitate to reach out. I'm open to all suggestions!

Also, if anyone is interested in helping out with the website, I'd love to hear from you. It's not as complicated as it might seem, and having at least two people familiar with the site would be great for coverage if one of us is ever unavailable.

To keep the conversation going, I'll be starting a dedicated "website" thread on our Discord server where we can brainstorm and exchange ideas more easily.

Please leave your comments on our discord channel

Looking forward to hearing your thoughts!

Thanks and 73,
Roger Bacak – N5RCB

Parks On The Air Events – Volunteers Needed!

We've got two more POTA – Support Your Parks Weekend events coming up this year, and I need YOUR help to make them happen!

I'm looking for someone to chair these events — that means helping with planning, logistics, and coordination. If you're interested in stepping up and supporting the club, please reach out!

Here are the event dates:

- Saturday, July 19, 2025
- Saturday, October 18, 2025

Let me know if you're interested or have any questions! -N5RCB@icloud.com

Shack Update

Over the last two weeks we have made some major upgrades to the shack. We replaced the two Windows 10 PC's on the desks with two new Dell PC's running Windows 11 Pro, Bluetooth mice and keyboards, and 27 inch monitors. We have the remote radio back up and working.

We were not able to move the Echolink node to the shack. When we keyed up the radio on the second UHF/VHF antenna, it threw a breaker. That also showed us the batteries on at least one of the UPS's in the shack were bad. We replaced batteries in both UPS's and will make another attempt at moving the Echolink node in the near future.

We are getting rid of the old computer equipment. The laptops and the desktops that were in the shack are taken. We have two Windows 10 desktops, one desktop running Linux, and two flat screen monitors available free to any club member. If you are interested please contact John C. by email at jjcheyn@gmail.com. If they aren't claimed by Saturday after the meeting, they will be recycled.

IARC Lending Library

The club has purchased a library of books from the ARRL. These books are in the shack and available for check out by club members only. We are working on a way for club members to get to to them. For now you can check them out at any shack event, or by contacting Ken, John, or Kim and setting up a time to meet. Please only keep each book two weeks at a time.

- ARRL Technician, General, and Extra class manuals
- ARRL Handbook
- ARRL Antenna Book
- Basic Antennas
- RFI Book
- Understanding Basic Electronics
- Basic Digital Electronics
- And many others

Club Equipment for Loan to Members

The club has several pieces of equipment that members can borrow for testing their stations, or for use at events. If you'd like to use some of this you can pick it up at any shack event, or make arrangements with John or Ken.

- Rig Expert AA-600 antenna analyzer
- IFR Service Monitor
- Anderson Powerpole crimp kit (you have to supply your own connectors)
- Soldering equipment
- Several desktop power supplies
- MFJ-557 Morse Code practice oscillator (for practicing CW)
- Multiple sets of HT's and tape-measure Yagi antennas for fox hunting
- 25 watt Retevis 2M mobile radio in an ammo can (great for events like the parades)

In addition we can lend out the UHF/VHF go box (contains two radios), the IC-7300, the PowerWerx battery box, and a number of antennas and coax runs to support special events or for testing.

RACES/ ARES Corner

The Irving RACES/ARES group is always looking for amateur radio operators willing to join them in community service to the city of Irving, all you have to do is be a licensed amateur radio operator, and either work or live within the city of Irving. If you are interested feel free to contact Carry Johnstone KD5RFB.

Siren Test

Reminder to all,

Both the IARC and Irving RACES ARES group have committed to support the monthly Irving siren (ENS -Emergency Notification System) test.

Irving has 26 sirens located through the City, on City property. All sirens rotate and make a LOUD siren type noise, with the exception of the one that is located on top of the Irving Convention Center that does not rotate.

There is always a monthly test that occurs on the first Wednesday of each month at 1:00 PM and lasts 3 minutes. There are two types of tests, a full function test, siren and rotation (if it is designed to rotate), and a silent test (rotate only if it is designed to rotate). The silent test is only done if there is any possibility of a weather threat, or any other reason the OEM (Office of Emergency Management) feels it may confuse the citizens.

We will only monitor the test for full functionality, NOT the silent test. I will notify all that has a siren assignment if the test is silent (usually before noon on the day of the test), and get confirmation you received that notification.

The individual effort will take only around 5 minutes at the location, but may take a total of 15-45 minutes, depending on travel time to and from. You MUST be close enough to your assigned location to see it rotate and sound for the full 3 minutes (ear muffs and/or ear plugs are recommended).

A list of all the sirens with the ones needing to be observed identified to choose from will be sent to all the IARC and Irving RACES ARES group members the weekend before the test. You will need to notify me of your choice, and I will conform it is yours to observe, or request you to pick another because somebody else has picked it.

We, as Amateur Radio Operators, enjoy this hobby, and this is one way we can give back to the community. This is one of the reasons the FCC has allowed us to have assigned frequencies/bands to operate on, as HAMS, to enjoy and have the skills needed to support any government entity if needed, or during times of a national emergency. It is a GREAT and fun hobby.

Regards,
Billy KA5OZC

Note: Volunteers are needed to help test the Irving city siren system every first Wednesday of the month. If you are interested in helping, please contact Billy KA5OZC at (214) 587-8729 or via email: wgeer@verizon.net

- QRZ - <https://www.qrz.com>
- QTH - <https://qth.com/>
- Gigaparts store - <https://www.gigaparts.com/>
- Ham Radio Outlet- <https://www.hamradio.com/>
- OMISS - <https://omiss.net/>
- Icom America - <https://icomamerica.com>
- Yaesu - <https://yaesu.com>
- Kenwood USA - <https://kenwood.com>

Thanks

Thanks to all who made it possible for the IARC to give me an award for my contribution to the club, however it was not gained without your help. Thanks again for the recognition and the help of the club.

73s De KB3RWT-Jerry A.

Let me take the opportunity to thank all our contributors to the current and past editions of the IARC club newsletter. I am always looking for articles that are ham related for the newsletter.

If you would like to contribute to the newsletter, please email your contribution to me at jerry.aberdeen@gmail.com, with the subject "IARC Newsletter and your callsign" e.g. IARC newsletter -KB3RWT

Going forward, I would like to have all articles for the newsletter sent to me on or before the Sunday of the week in which our in-person meetings are held., but I will accept articles as late as 8pm on the Tuesday before the meeting. This gives me time to organize, create and send out the newsletter in a timely manner. Thanks.
